PROFESSIONAL SUMMARY

Cum Laude Information Technology graduate with hands-on full-stack experience, from a Flask-based university counseling platform to a TypeScript and MongoDB system used by municipal staff in daily operations. Comfortable with the full software development lifecycle: gathering requirements, coding, testing, debugging, and supporting releases. Experienced with Python, Java, C#, TypeScript, REST APIs, SQL databases, and Linux VPS operations. Seeking an Associate Software Engineer role.

TECHNICAL SKILLS

Languages: Python, Java, C#, TypeScript, JavaScript, SQL, HTML5, CSS3

Frontend: React, Tailwind CSS

Backend: Flask, REST APIs, WebSocket, WebRTC

Data: PostgreSQL, MongoDB

Practices: Software Development Life Cycle (SDLC), Testing and Debugging, Git/GitHub, CI/CD

AI-Assisted Development: GitHub Copilot, Claude Code

Cloud & Tools: DigitalOcean, AWS, Hostinger VPS, Linux (Ubuntu), phpMyAdmin, Microsoft Office

Systems: Windows Server, Active Directory, Cisco

PROJECT EXPERIENCE

PiyuGuide | Inquiry and Counseling System **2025-2026**

Lead Developer, Capstone Project | Laguna State Polytechnic University | piyuguide.live

- Led end-to-end development of a multi-campus inquiry and counseling platform using Python and Flask, with WebSocket messaging and WebRTC video consultations to replace paper-based coordination.
- Designed a multi-tenant PostgreSQL data model that separates records and workflows across offices and campuses.
- Deployed and maintained the production service on DigitalOcean, including server configuration, uptime monitoring, and release management.

Siniloan Digital Governance Platform **Mar-Jun 2026**

Software Development Intern, SICTO | Municipality of Siniloan, Laguna | siniloandgp.com

- Built a production TypeScript single-page application backed by MongoDB for HR management, travel orders, and secure employee records; municipal staff use it in daily operations.
- Worked with municipal staff to translate manual workflows into digital modules, contributing across data schema and user interface implementation.
- Configured and maintained the Hostinger VPS, including database backup routines and uptime maintenance.

TagTrack | RFID Lost-and-Found System **2024-2025**

Final Project | Laguna State Polytechnic University

- Developed a PostgreSQL-based campus lost-and-found system integrating RFID hardware for item tagging, scanning, and status updates.

PROFESSIONAL EXPERIENCE

Software Development Intern | Programmer and Technical Support **Mar-Jun 2026**

Siniloan Information and Communication Technology Office (SICTO) | Municipality of Siniloan, Laguna

- Followed the full software development lifecycle (requirements, design, development, testing, deployment, and support) for a government-facing production system.
- Gathered requirements from municipal staff and SICTO, coordinated iterative testing, and resolved issues before public launch.
- Tested, debugged, and fixed application issues, and provided programming and technical support to keep the system reliable for daily municipal operations.

EDUCATION

BS Information Technology, Major in Network Administration **June 2026**

Laguna State Polytechnic University, Siniloan (Host) Campus | Graduated Cum Laude
