ABOUT ME

I am an IT student at Laguna State Polytechnic University, passionate about developing innovative and practical software solutions. I specialize in web development using Python Flask, HTML, CSS (Tailwind), and JavaScript, and I enjoy building systems that solve real-world problems.

EDUCATION

Laguna State Polytechnic University

Laguna Senior High School

San Juan National High School

WORK EXPERIENCE

Capstone Project: Inquiry Management System

- Developed a platform where students can submit inquiries to multiple university offices.

TagTrack: University Lost and Found System (Side Project)

- Designed a system powered by RFID to track high-value items on campus.
 - Enabled automatic ownership retrieval when scanned and a manual lost-and-found logging process.
-

SKILLS

- Web Development
- Database Management
- Version Control
- System Design & Integration
